

Mansi Salar

+91-8395808043 — mansisalar@gmail.com — LinkedIn — GitHub — Portfolio

Skills

Languages: Java, JavaScript, Python, C++, C, SQL
Frontend: HTML, CSS, JavaScript; **Familiar:** React
Backend: Node.js, Express.js, Python, Flask
Database & Authentication: MongoDB, Mongoose, JWT, bcryptjs
AI / RAG: Gemini API, Gemini Embeddings, FAISS, PyPDF, Retrieval-Augmented Generation
Tools: Git, GitHub, Postman

Projects

- AI FAQ Assistant — Retrieval-Augmented Generation** 2026
- Built a PDF question-answering application using Python, Flask, Gemini 2.5 Flash, Gemini Embedding 001, FAISS, and PyPDF.
 - Implemented a manual RAG pipeline for PDF extraction, chunking, embeddings, vector similarity retrieval, prompt construction, and document-grounded responses.
 - Added conversation context, chat reset on new PDF upload, and fallback handling for questions outside the uploaded document.
- Mini Transformer — Transformer / Deep Learning** 2026
- Built an educational Transformer language model using NumPy and PyTorch, implementing embeddings, Q/K/V projections, multi-head self-attention, causal masking, feed-forward layers, residual connections, and LayerNorm.
 - Developed next-token prediction using PyTorch autograd, Adam optimization, and cross-entropy loss, with model checkpointing and greedy text generation.
 - Added automated tests for NumPy and PyTorch components, achieving 43/43 passing tests.
- Flask Product REST API — Backend / REST API** 2026
- Built a Flask REST API for product management using Python, SQLite, and SQL with CRUD operations, JSON responses, validation, and HTTP error handling.
 - Implemented parameterized SQL queries and automated tests for product creation, retrieval, updating, and deletion.
- CARA E-Commerce V2 — Full-Stack Web Application** 2026
- Built a full-stack e-commerce application using HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, and Mongoose.
 - Implemented JWT authentication, product catalogue, cart, checkout, order history, stock management, and role-based user/admin authorization.
 - Developed an admin dashboard for product CRUD and order status management.

Training & Internships

- AI Agents for Beginners — Salesforce Trailhead** Jun 2025 – Jul 2025
- Completed hands-on Trailhead training covering Agentic AI, workflow automation, and Salesforce AI capabilities.
- Java Development Internship — OctaNet Services Pvt Ltd.** Jan 2025 – Mar 2025
- Developed a Java-based ATM Simulator implementing authentication, transactions, and account management features.
- C++ Programming Internship — Tech Alpha** Jun 2024 – Aug 2024
- Built a GPA and grade calculation system with percentage-to-grade mapping and input validation.

Certifications

- TCS iON Career Edge - AI Foundation — TCS iON** Sep 2026
- Legacy JavaScript Algorithms and Data Structures V7 — freeCodeCamp** May 2026
- Academy Accreditation - Generative AI Fundamentals — Databricks** May 2025

Education

- Jaypee University of Information Technology, Solan** 2022 – 2026
- Bachelor of Technology in Computer Science and Engineering*
- Minor: Cloud Computing*
- CGPA: 7.5**
